

Shadow Tactics - the Board Game Kickstarter campaign has launched and will run until February 14th.

Based on the acclaimed video game, the creators of Kickstarter-success Saltlands has brought you Shadow Tactics - the Board Game!

Shadow Tactics is a fast-paced tactical stealth game with detailed plastic miniatures, engaging story-driven missions and an ever-changing, non-linear campaign structure. Defend the fragile peace of newly unified Japan playing as one of the five unique ninja characters with vastly different skill sets or play the role of the Daimyo, an evil mastermind plotting against the Shogun, relying on superior numbers of soldiers and samurai.

Find out more about the game, pledge levels, and what other say about the game on the [campaign page](#)

Please note, that in the reviews and on some photos you can see the prototype version of the game. Final components will be of high-quality, professional materials made by Panda Games. Also, the prototype version uses paper standees, all of which will be replaced by highly-detailed plastic miniatures in the final game.
